Subject: (E) Re omega planning

Hello Christopher

Alison Hilton has asked me to forward a few extra comments on the Omega planning application as I am probably the nearest resident at Old Bold Hall to it .

Most of the relevant points regarding our objection to this proposal were made in our original objection letter however after the last year of " lockdowns" I feel I need to emphasise a couple of points We have lived here over 20 years and have watched and nurtured this green environment but none more so than this last year and feel great sadness that the ancient woodlands and green fields could be devastated and lost by the impact of this monstrous building. I am sure you are aware via Mrs Hilton of the range of wildlife in Booths Wood (owned by Mrs Hilton and not for development

by Mr Morris as often suggested in his reports) and its surrounding fields by the building processs ,the building itself and the noise/light pollution etc.Sadly once this has occurred and the woodlands destroyed there is no turning back and no amount of saplings replanted will reverse the damage done. The recent woodland trust report has discussed the importance and need for trees and the preservation of woodlands.

So many more members of our community are now utilising the area for its tranquility ,beauty and sense of well being, the loss of this to the area for an automated factory will be devastating The planning council themselves when other projects in the area have been discussed have cited the importance of the green belt as objections(Pre/2020/0170/prec) yet allow a factory which destroys it and crosses conurbations seems acceptable.

Sadly the impact of this factory development if allowed will be felt for many generations to come affecting the wildlife the health of the community and the heritage of the area Kind regards John and Jill Mclindon
